

P.E.A. LEO-HB®

A New Generation of Cold Water Dispersible & Soluble Ingredients

Active Ingredient

- Palmitoylethanolamide

Description

- White/off white free-flowing powder, instantly Cold Water Dispersible, Palmitoylethanolamide (P.E.A.) is a chemical made from fat, derived from egg yolks.
- P.E.A. has been extensively studied for reducing pain and inflammation. P.E.A. acts as an anti-inflammatory agent, reducing the production of inflammatory molecules and increasing the production of anti-inflammatory molecules. P.E.A. has been shown to be effective in reducing pain and inflammation associated with chronic pain, neuropathic pain, and inflammatory bowel disease. Moreover, P.E.A. has been shown to have neuroprotective properties, making it a promising natural remedy for neurological disorders. Additionally, P.E.A. may have potential applications in the treatment of depression and anxiety, as it has been shown to have anxiolytic and antidepressant effects.**
